

FCC -

I am an XM radio subscriber and depend on this service for weather and traffic conditions as I frequently travel from NH to NJ. I find it extremely difficult to determine where local area radio stations are on the dial as I travel from state to state. I pay a monthly service fee and do not feel it is up to the FCC or the National Association of Broadcasters to determine what content I can, and cannot listen to. I am extremely offended at both the FCC, and the NAB's efforts to limit my freedom of choice on the radio. I am respectfully urging you to reject the NAB's petition 04-160, and request you to support XM's ability to provide their valuable service which I pay for.

Thank you,

Matthew F. Barrington
